Supervisory Patent Examiner, Art Unit 2624							

Continuation of 11. does NOT place the application in condition for allowance because: Applicant alleges the translation is inaccurate or unclear. However applicant has failed to provide any support for his assertion beyond mere allegations. The examiner notes the policy regarding translations:

Machine translations (or English language equivalents) should typically be used in lieu of hand translations. If applicant timely files a certified translation contesting the reliability of a machine translation, the examiner should consider the certified translation. Furthermore, examiners may order a hand translation from Scientific and Technical Information Center (STIC) in the following situations: (1) When applicant contests the machine translation and supplies an uncertified translation (or other evidence) to show that there are material errors in the machine translation to cause it to be unreliable to support the rejection; (2) When the examiner has reasons to believe that the machine translation contains material errors to cause it to be unreliable to support the rejection; and (3) When a machine translation is not available through STIC and it is not readily available elsewhere.

The examiner does not believe there are material errors in the machine translation which render it unreliable to support the rejction. Furthermore, the translated reference is only relied upon to demonstrate the filters of Li could be replaced/combined with three dimensional filtering as disclosed by Kachelriess. This is shown on pages 1 of the translation "approches to acomplish the filtration raw data based adaptive (matched at each single measured projection value) in all three dimensions are so far not known" (i.e. in the prior art). Page 2 of the translation provides a discription of the three demensional filter. In fact pagees 2 and 4 of the untrnalsated document clearly demonstrate a 3D filter as equations are not language specific also shown in the top of page two of the translated document. The absence of column an line numbers is not sufficient to demonstrate an inaccurate translation. The section cited by applicant requires that a translation of the full text be provided and not just the abstract. The examiner has not relied on the abstract and has provided a translation of the abstract. Applicant has not demonstrated that the translation is inaccurate or unreliable.
